## You Must See it to Treat it.

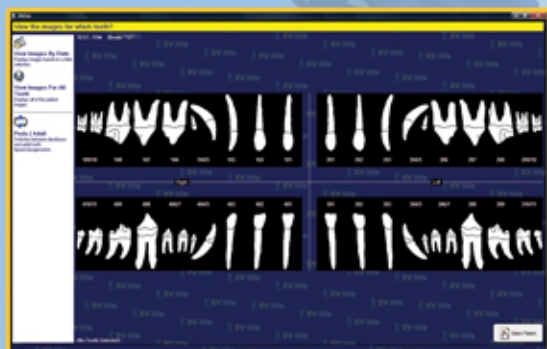

**Sadie:** Damaged root and bone surrounding distal root. Radiograph can be used as extraction guide.

**Ellie:** Large area of bone loss around both roots of a dead tooth that "appeared" normal. Owners claimed Ellie acted like a new animal post recovery.

## Make Seeing it to Treat it easy with DentaLaire's Bio-Ray SDX Digital Dental X-Ray System

Best Sensor • Best Software • Best Support

## Purchase a DentaLaire Bio-Ray SDX and get

## 5 FREE radiographic consults from VetDentalRad.com

### Our Promise

"VetDentalRad.com is committed to assist veterinary medical personnel everywhere with Veterinary Dental Radiology interpretation and training. All of our consultants are Board Certified Veterinary Dental Specialists as certified by the American Veterinary Dental College. All consultants are also engaged in private clinical practice, which makes them uniquely qualified to correlate radiographic findings with clinical implications. Comprehensive reports are simultaneously faxed, e-mailed and made available online in a timely fashion."
